

YOU GOT 'EM? WE STOP 'EM.

Pigeons and squirrels are a problem no more

Keep the critters in their place — out from beneath your modules. Our simple, secure system finally lets you easily and affordably seal up residential PV systems from intrusion. A tight fit deters entry from all sides, including at the roof line.

- **No Roof or Module Penetration**
- **No Special Tools**
- **Quick and Easy Installation**
- **All Non-Corrosive Material**
- **Unobtrusive Black Color —**
blends into shadows beneath modules
- **Minimal Cutting and Trimming**

Little folding or cutting is required and the clips attach with nothing more than a pair of linesman pliers.

Safeguard your production guarantee. Instill peace of mind for yourself, your customers and your third-party owners. Pigeons, squirrels, raccoons, roof rats?

Whatever you got, they're a problem no more.
