TRUE DEEP-CYCLE BATTERIES

90+ Years of True Deep-Cycle Experience and Expertise

SOLAR

TRUE DEEP-CYCLE BATTERIES

SOLAR INDUSTRIAL

The Solar Industrial Line is engineered specifically to support renewable energy systems with large daily loads where the batteries are cycled regularly. These high amp-hour capacity batteries are ideal for use in large off-grid photovoltaic (PV) systems, off-grid hybrid PV systems, grid-tied PV systems with battery backup, smart grid peak shifting systems and a variety of other applications. The Solar Industrial Line is tested to IEC standards and features advanced battery technologies that deliver reliable power. Trojan's Solar Industrial Line is the perfect combination of performance and function.

SOLAR PREMIUM

Trojan Battery's Solar Premium Line of flooded deep-cycle batteries is specifically designed to withstand the rigorous conditions of renewable energy applications. Our product strategy is focused on one simple objective – manufacture the highest quality battery available in the industry which is why our Solar Premium Line is tested to IEC standards.

SOLAR SIGNATURE

The Solar Signature Line of deep-cycle flooded batteries is the flagship of Trojan's product portfolio. Engineered to provide rugged durability and outstanding performance, Trojan's Solar Signature Line is perfectly suited for use in renewable energy systems where lowest life-cycle cost is the key consideration. An all around power house, the Solar Signature Line features Trojan's historically-proven engineering with T2 Technology, an advanced battery technology for maximum sustained performance, longer life and increased total energy.

SOLAR AGM

Trojan has incorporated several key engineering features in its Solar AGM batteries for renewable energy, hybrid and backup power applications that require deep-cycling power in a non-spillable battery design. Engineered for best value and worry-free storage, Trojan Solar AGM maintenance-free batteries can be counted on day in and day out as a reliable power source for a wide range of off-grid and unreliable grid applications.

The inclusion of **Smart Carbon™** to Trojan's Solar Industrial and Solar Premium advanced lead acid lines provides:

- A decrease in the rate of sulfation in PSOC conditions
- Improved charge acceptance
- Faster recharge in PSOC applications
- High energy efficiency

Designed for Best Value in Solar + Storage Applications

- Remote Micro-Grids
- Solar Street Signs/Lights
- Off-Grid Residential
- Leisure/Tiny House
- Oil & Gas
- Grid-Tied Solar Home Systems
- Residential & Commercial Backup
- Telecom

SOLAR INDUSTRIAL

3,600 Cycles
@ 50% DOD
610-2450 Ah @ C100

SOLAR PREMIUM

1,900 Cycles
@ 50% DOD
225-1255 Ah @ C100

SOLAR SIGNATURE

600 – 1,200 Cycles
@ 50% DOD
95-490 Ah @ C100

SOLAR AGM

1,700 Cycles
@ 50% DOD
135-375 Ah @ C20

SOLAR LINE CYCLE LIFE CHART

This chart illustrates the cycle life ratings for Trojan's Solar Line of deep-cycle batteries for renewable energy applications.

Terminal Configurations

* Polyon™ Case

- A. The amount of amp-hours (Ah) for Solar Line batteries can deliver when discharged at a constant rate at 86°F (30°C) and maintain a voltage above 1.75 V/cell. Capacities are based on peak performance.
 B. Dimensions may vary depending on type of handle or terminal. Batteries to be mounted with .5 inches (12.7 mm) spacing minimum.
 C. Dimensions taken from bottom of the battery to the highest point on the battery. Heights may vary depending on type of terminal.
 D. Weight may vary.
 E. The Energy (kWh) for the Solar AGM batteries are based on the 20-Hr Rate.
